

✓ Rapid Fix

Using the Troax Rapid Fix system, mesh panels can be easily removed and re-installed allowing quick and easy access to machinery in need of maintenance. The brackets can be positioned at varying heights compensating for uneven floors as well as for fitting panels of different sizes within the installation. Rapid Fix is fully compatible with Smart Fix and also uses the same door system making it possible to combine, mix or upgrade to suit your requirements. The unique Rapid Fix system also complies with the machine directive 2006/42/EC.

FACTS

Finish
