

Hygienic Frameless Machine Guarding

Competition-Line from NTF-Aalborg by Troax is a hygienic modular system in stainless steel, designed to combine hygiene and safety.

Based on a welded mesh fixed to square stainless steel posts it's a very easy system to install, still hygienic and suitable for the food industry.

The system meets the requirements of the Machinery Directive as the components are held captive in the guard even when the system is disassembled.

It's constructed entirely in AISI 304 and can be supplied in AISI 316 upon request.

FACTS

System Posts

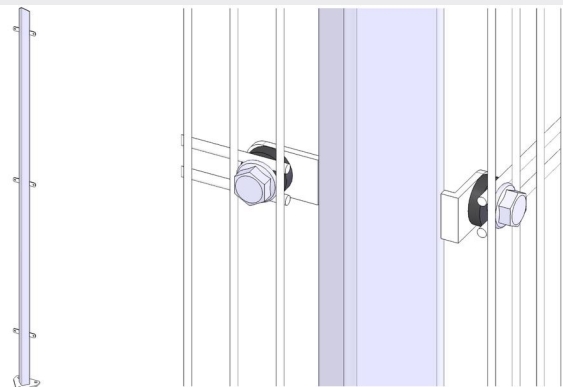

Post Stainless Steel

2000 mm height

Floor distance 130 mm.

System brackets

All fixings are flange bolts and spacers

System Panels /Door

Mesh panel widths mm 1000/ 2000

Hinged door including frame, mm 1000

Panel height 1870 mm. Mesh size 135x20 mm, wire 3x4 mm
