

# SAFE ESCAPE LOCK PANIC BAR CISA

The single hinged door in size 1,000 mm wide can be equipped with a panic bar solution that is mounted on the inside of the door blade. It's combined with the Safe Escape lock to keep the door in a closed and locked position from the outside. Read more about the Safe Escape Lock features and the various safety switches it can be combined with under Safe Escape Lock.

The Panic Bar CISA is a fast exit device with a red-painted aluminum alloy cover. It's CE marked in accordance with 89/106/EEC DIRECTIVE issued by ICIM and certified according to EN 1125. Assembled together with the Safe Escape lock and mounted on a Troax single hinged door, it will fulfill many of the Performance Characteristics stated in both EN 1125 for panic exit devices and EN 179 for emergency exit devices.
