

# LIGHT GRID /LIGHT CURTAIN FIXINGS

The kit 6650 for light grids/curtains contains fixings for 2 pair of light grids/curtains.

The upper and lower fixing for each light grid are assembled onto the Smart Fix Open bracket, that can be put in any height on the Troax 60x40 posts. This makes it very flexible to adjust in height and easy to get the correct vertical angle to match the sender/receiver.

The top and bottom fixings for each light grid are made of two parts that are mounted together and these can be turned sideways to get the correct horizontal angle.

The Kit 6650 Light grid/Light curtain fixings are compatible with the below light grids/ light curtains;

- REER EOS
- REER Safegate
- OMRON F3SG
- Euchner LCA
- Telemecanique XUSL
