

# HEAVY TRAFFIC BARRIER

Our Heavy Traffic Barrier is the strongest steel barrier alternative to protect people from fork trucks/vehicles. It is built by bolting rectangular posts and beams together in a very robust construction. With using both end, middle and corner posts together with three different beam lengths, it is possible to create endless customized solutions.

#### Posts:

100x100x3 mm

Height: 1100 mm

Colour: Yellow RAL 1021
