

HORIZONTAL TOP PANELS

The fastest and most cost-effective way to build a high wall is with standard panels. You can use all our panels as laying down top panels, 200 mm – 1500 mm, that is eight different heights available without any cutting and welding of top panels, total height can be 2400 mm – 3700 mm.

The flexibility increases when different heights are required, furthermore the delivery time will be better using standard panels.

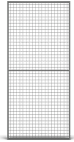

The Horizontal Top Panel kits are compatible with UR350, UR325, UX450.
