

2-LEVEL BIKE RACK HYDRAULIC

With our smart 2-level rack, the bikes are parked on two levels. A solution that doubles the capacity, the bicycle storage is used to the maximum! The bikes on the upper level are easily lifted up and down using gas spring technology.

Each section comes in a lower and an upper slot, they are placed with c/c 400 mm or c/c 375 mm and the construction is built according to the dimensions of the room. Our double racks are delivered in galvanized steel for indoor and outdoor use. The ceiling height should be approx. 2.7 m for indoor installation.

FACTS

- Width: C/C 375-400 mm between sections
- Surface treatment: galvanized
- Info: minimum ceiling height 2725 mm
- Other: for indoor and outdoor use
