

BIKE RACK SCR13

Bicycle rack that is placed on the ground with parking on two levels to prevent the handlebars from getting stuck together.

The rack has four places, but it is possible to assemble several in a row and it can be tilted at 45 degrees.

The bicycle stand is made of a 19 mm pipe and is hot-dip galvanized, c/c 400 mm between each place.

FACTS

- Width: c/c 400 mm between each stand
- Surface treatment: Hot-dip galvanized
- Info: can be tilted 45 degrees
- Other: 4 stands
