

ACCESSORIES

To make the Belt Conveyor Guarding complete there are some accessories that can be added to the system. All are made of steel with hot dip galvanize coating, providing good corrosion protection suitable for very harsh environments.

- **Holder for emergency stop rope.** A hook that is fixed through the hole of the lower bracket that keeps the emergency stop rope in place along the belt conveyor.
- **Fixing plate for mezzanine floors.** With the fixing plate for mezzanine floors you can mount the standard 60x40 posts onto the plate and fix it through the mezzanine floor with J-hooks.
- **Wedge-locking washers.** To secure the bolted joints in environments with severe vibrations.

FACTS

| ART. NO | COMPONENTS |
