

POST AND FIXINGS

The open, U-shaped design of our post helps prevent the accumulation of dust and residue, ensuring a hygienic machine guard. The post has inclined surfaces and floor spacers to avoid liquid pooling, enabling easier and more efficient cleaning.

The panels are fastened to the posts with high-resistant, captive fixings made of techno-polymer and stainless steel to minimize metal-to-metal contact, avoiding bacterial accumulations.

Height: 2240 mm including spacers

Post: 60 × 60 mm U-shaped

Anchoring points: 3
