

# ELECTRIC STRIKE

An electrical strike is a good option when you need an electrical keyless control of your door. For example together with a tag/code/card system. Our electrical strike kit includes the lock, lock tube, end sheet tube, brackets for the electric strike, handle, hinges and door stops (only for hinged door). The door leaf, cover sheet and the actual electric strike must be added separately to have a complete door.

## FACTS

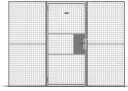

ART. NO	COMPONENTS
36700048	El. strike EFF/EFF 112KL 24V Fail locked
