

DOOR UX450

The UX 450 door is included in the Troax Medium system to be used in combination with UX 450 mesh panels or UR 350 panels as partitioning. The door is excellent for use in spaces that have relatively strong exterior protection. The padlock door has a specially designed cover to protect the padlock, minimising the risk of break-ins. The door is also available as a cylinder lock option. The leaf has a frame made from 30x20 mm steel tubing and two specially designed cross tubes, making it stable and secure. These doors are thresholdless, which makes them easy for people with disabilities to use and are delivered ready for installation. Doors are available in heights from 2,200 mm and there are two standard widths, 750 mm and 900 mm.

FACTS
