

EUCHNER MGB, MGB-PN

The MGB (Multifunctional Gate Box) is an interlocking or guard locking system suitable for environments with extremely high safety requirements. It's more than a safety switch, offering interlocking, guard locking, escape release, and functions such as buttons for start/stop, emergency stop, etc. All MGB components are optimized for use on fences and it's equally suitable for doors hinged on the left or right as well as for sliding doors. Both mounting and changing the actuating direction can be undertaken quickly and easily. The lock complies with Performance Level e (Guard Locked) in accordance with EN ISO 13849-1 or SIL3 in accordance with EN 62061. The MGB can be ordered via Troax and pre-assembled on your single hinged door. Or we supply the bracket that will fit your choice of MGB-version.
