

BASTION PANELS

Bastion is a cost-effective, heavy-duty angle-framed single-skin partitioning system designed for exceptional strength and adaptability.

Available in All Steel, All Mesh, Steel Glass, Steel Glass Steel, Steel Mesh, and Steel Mesh Steel, Bastion panels offer superior resistance through a welded combination of steel and mesh sheets.

The panels are constructed from 40mm x 40mm x 2.5mm angle steel, with 0.7mm thick steel infill sheets for panels up to 1m wide and 0.9mm thick steel infill sheets for panels wider than 1m. The wire mesh has a diameter of 3.2mm. It makes it an ideal choice for establishing high-security perimeters and creating secure environments.

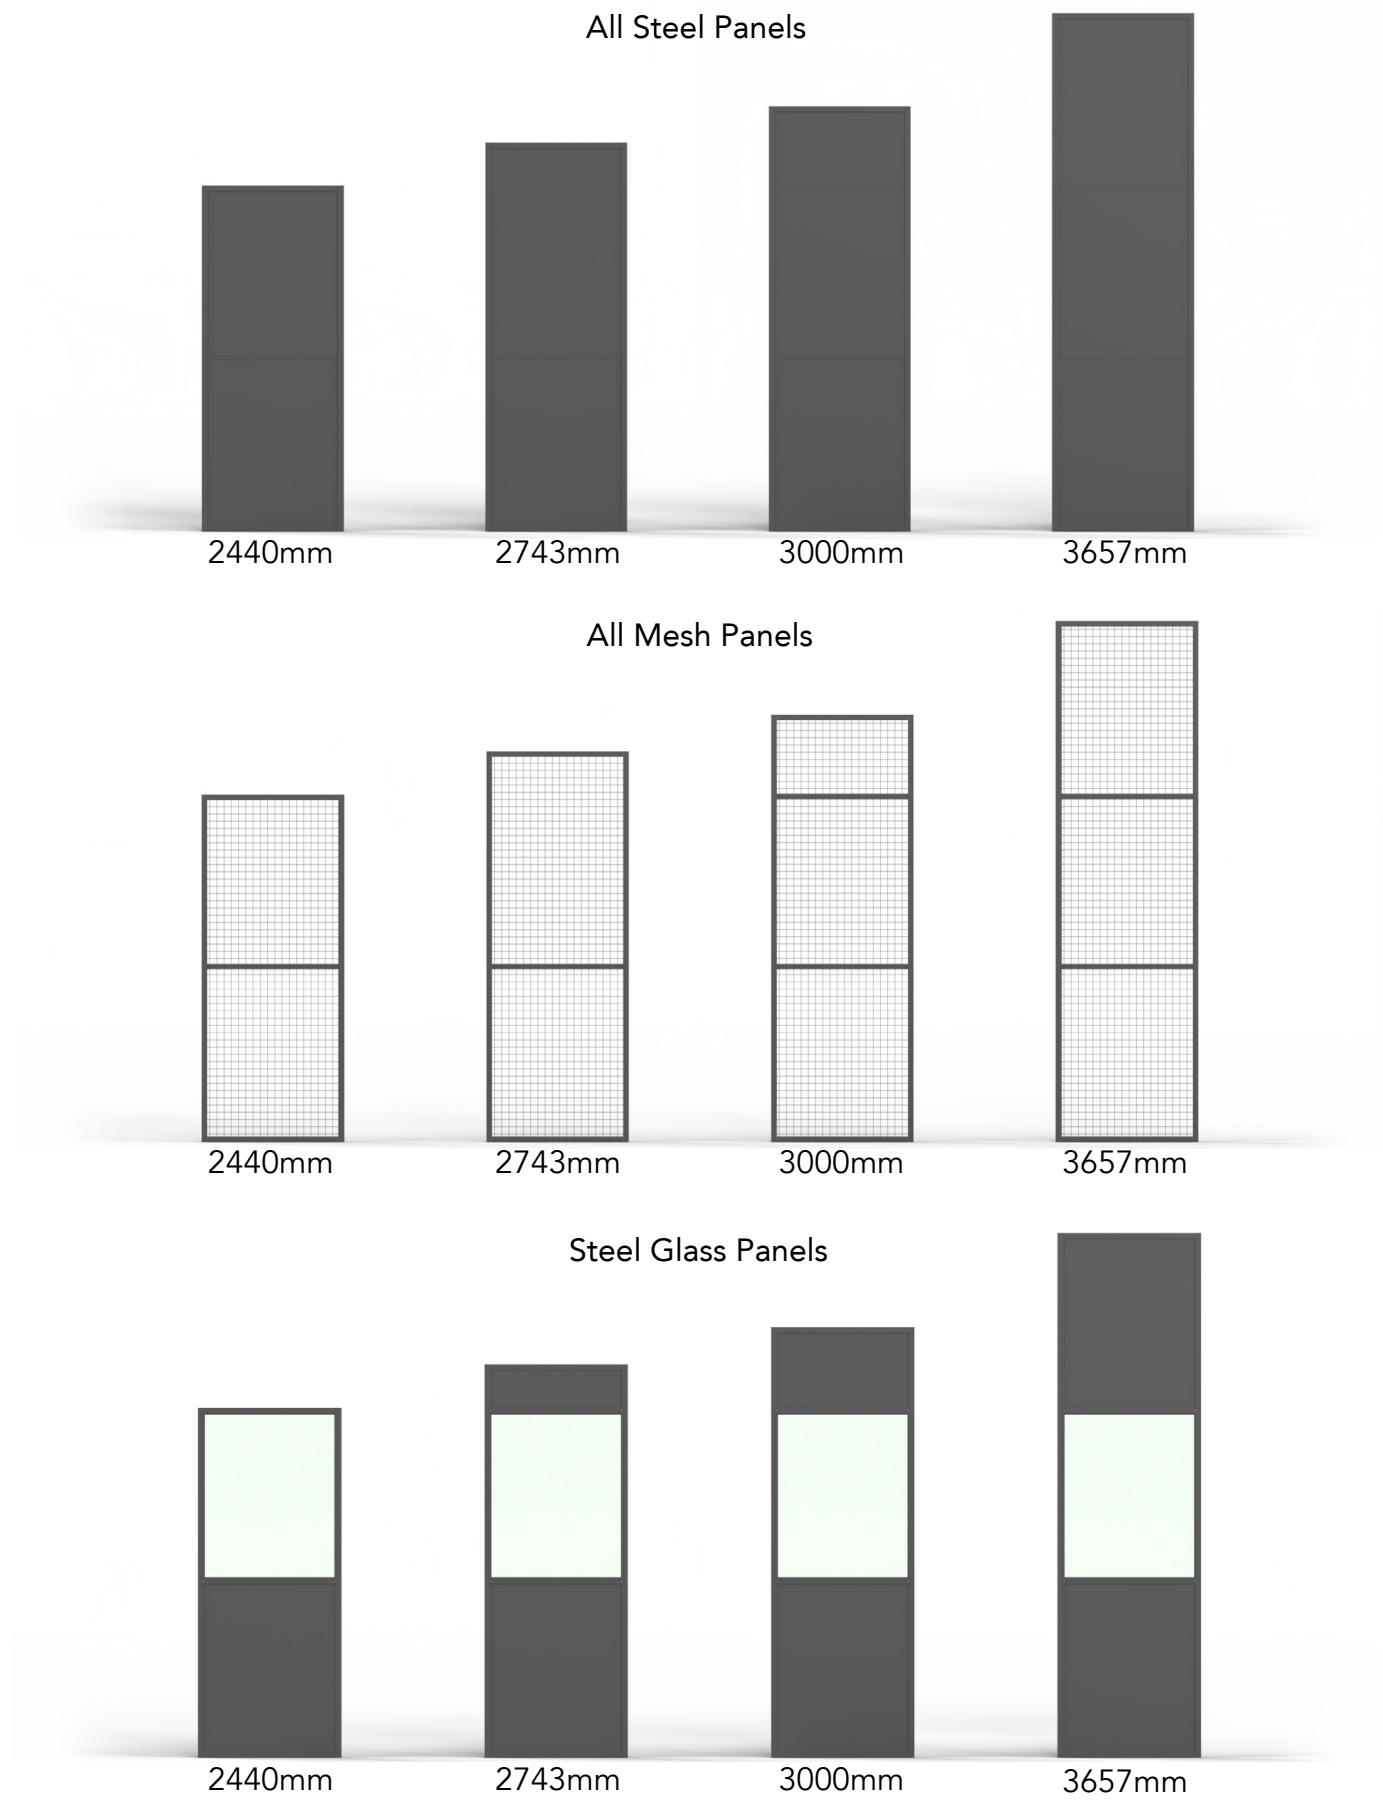

PANEL FACTS

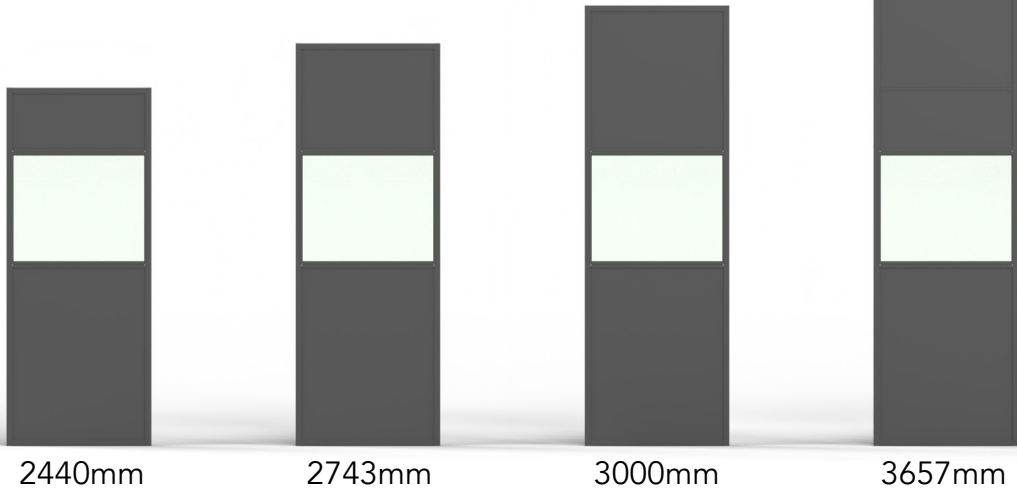

Variations	Max Widths	Max Heights	Dado Heights	Glazing Vertical Opening
All Steel (AS)	1000mm 1200mm	3657mm 2743mm	1232mm	N/A
All Mesh (AM)	1000mm 1200mm	3657mm 2743mm	1232mm	N/A
Steel Glass (SG)	1000mm	3657mm	1232mm	1149mm
Steel Glass Steel (SGS)	1000mm 1200mm	3657mm 2743mm	1232mm	736mm
Steel Mesh (SM)	1000mm 1200mm	3657mm 2743mm	1232mm	N/A
Steel Mesh Steel (SMS)	1000mm 1200mm	3657mm 2743mm	1232mm	N/A

Standard widths are supplied in 100mm increments. Custom panel heights and widths are available on request. Panels can be configured in multiple lifts to achieve a desired partition height. Structural considerations may need to be made.
