

# MKII Titan Doors

## Double Skin Steel and Laminate Doors

The MKII Titan hinged door is now available in steel. Its flush finish compliments the Titan partitioning range perfectly to create clean fluid environments.

The Titan doors have been specially designed with two individual trays to make the door stronger and keep dust traps to an absolute minimum ensuring a hygienic environment can be well maintained.

## Facts

The high quality steel Titan doors are constructed from two steel panels fixed together creating a structurally stronger door. The laminate doors have an additional option to come in a two-tone colour.

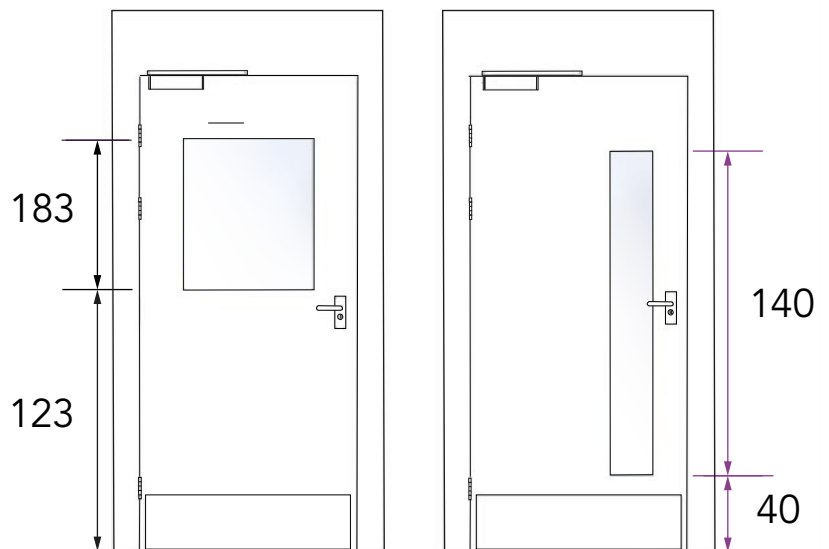

As standard this door will come with stainless steel furniture, flush glazing and kickstrips.

### Single Door:

	Panel Height (mm)		
Panel Width (mm)	2390	2695	3000
1000	✓	✓	✓

### Double Door:

	Panel Height (mm)		
Panel Width (mm)	2390	2695	3000
2051	✓	✓	✓
