TROAX™

Beyond Safety

We turn protection into performance

For 70 years, we have protected people, property and processes across a wide range of industries, driven by one mission: zero harm in every workplace. This experience has given us unmatched knowledge and expertise: not only how to protect workplaces, but also how to turn protection into performance.

We know what it takes to safeguard uptime, keep production moving, optimise workflows and create the conditions for every operation to excel – with safety at the heart of it all.

That's why leading industrial companies keep choosing Troax.

Smooth, reliable and sustainable solutions

With you all the way

Our expert teams are with you every step of the way, from understanding risks and defining specifications to installation, handover and ongoing support. Our digital tools make that process simpler and more efficient, with easier quoting, online product configuration and interactive assembly instructions.

We combine the global reach of eight facilities across three continents with local expertise and support in over 40 countries. Meaning high capacity, short lead times and reliable delivery, with the same high safety standards wherever the operation is based.

Verified safety

In our own Test Centre, we verify that our solutions deliver the safety we promise. Independent certification to EN ISO 14120, ISO 9001 and ISO 27001, verified by TÜV Rheinland, confirms that our methods are sound, repeatable, and transparent.

One partner. For less complexity and lower total costs.

We offer the market's widest range of industrial safety solutions, providing complete coverage from industrial traffic management and barriers to machine guarding and racking solutions.

Our systems are modular and available as standard or tailored solutions, depending on requirements. They work together and integrate seamlessly across sites, simplifying engineering, installation and future changes.

Simply put, when you choose Troax, you only need one industrial safety partner for all your operations. We cut complexity and drive down your total cost of ownership.

Barriers

From the loading dock to the production aisle, our barriers protect people, equipment, and operations across industries. Made from flexible polymer, they absorb the strike and flex with the impact, helping preserve your concrete, racking and machinery.

Machine Guarding

Impact-tested and TÜV-certified as a complete system, our mesh guarding holds firm on impact, keeping people out and ejected parts in. Modular, quick to assemble and easy to reconfigure as your line evolves. A safety distance of just 120 mm frees up valuable floor space.

Racking Solutions

Troax makes your racking safer from within, with Anti-Collapse Mesh, mesh decks and dividers working together to keep goods contained. From the back of the rack to every level, your goods stay put, your people stay safe, and your operation keeps moving.

Partitioning Walls

Troax partitioning is built to move. Fully modular and configured on site to fit your exact space, whatever its shape or constraints. As your operation changes, adding a zone, resizing a room, reworking a layout, the same panels relocate and adapt with it.

Industrial Traffic Management

Manages access, guides traffic and warns drivers and pedestrians at crossings, junctions and loading docks, helping reduce collision risks where people and vehicles meet.

Safety Fleet Management

Brings vehicle location, access control, impact monitoring and operating data together in one cloud-based platform, supporting safer driving and planned maintenance.

Data Centre Solutions

Mesh partitions, louvre walls and colocation cages secure zones. Aisle containment controls airflow; transformer cages protect electrical infrastructure. Modular systems control access and scale with capacity.

Property Storage

Enclosures for resident, bicycle, car and parking, and individual lockers for shared spaces. Built around the building, our systems create secure, organised spaces that simplify management.

When safety is designed and delivered at the highest level, what begins as protection becomes a platform for performance. It brings teams clarity and focus, makes operations run more smoothly and perform at their best.

This is what defines Troax. We create the conditions for every operation to perform at its best – by guarding people, property and processes from harm.

Seven decades of leadership have taught us that real safety goes beyond prevention. It is the foundation on which performance is built.
