

Double Sliding door Doublerrail UX450

Caelum sliding doors are available in a wide range of opening widths and heights. Available options include a single sliding door, a double sliding door in a single rail or a double sliding door in a double rail. They are all supplied with a lock mechanism and handle. Other locking options such as a padlock or single or double cylinder locks can be incorporated. Top guide rails are of an aluminium construction, which helps keep running bearings in place. The rails are cut to the required lengths.

FACTS
