

Door handle

The cylinder lock is easily fitted to our mesh, pc or steel sheet doors and includes a lock case from SAG. The locking tube as well as the striking plate, are reinforced with a welded steel cover to reduce the risk for manipulation. Extra hooks makes it impossible to open the door by pulling it sidewise.

Complement with any of our variants of profile cylinder; double or single with same or different lockings, or contact your local locksmith for easy maintenance solutions.

The Cylinder Lock can be supplied pre-mounted on our single hinged doors, or supplied as parts in a lock kit for mounting on site.
