

ACCESSORIES PARTITIONING

Due to Troax wide range of accessories our warehouse partitioning walls can be built and adapted in countless ways to meet with every unique situation and thereby create solutions that suit all customers. Accessories including fixings and fasteners complete the system and the range also include cut-profiles for adjusting the mesh panels in places where standard measurements are not perfect. We also have smart add-on articles, such as door closer and espagnolette, when a stronger, more stable, and/or a thorough door, with extra functions, is requested. For extra security, we have our Secure fasteners.
