# PANEL UR300

The UR300 panel system from Troax is a light-duty, modular mesh system that is suitable for creating added storage within a well-protected environment. The mesh, constructed from press welded 2.5 mm wires with mesh aperture 100x50 mm, is welded to a 19x19 mm tubular frame for added strength. The panel is available in 7 widths between 200 mm up to 1500 mm. The system is ideal for creating inner partitioning walls or roof within a secure storage application when used in conjunction with the Troax UR 350 & UX 450 panels. It can also be used on its own for applications where a less degree of security is required.
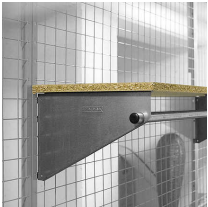

FACTS
